STAINLESS STEEL

Ermaksan Speed-bend SB6100-400 CNC controlled hydraulic press brake

Typesetting we arrange on our Ermaksan Speed-bend SB6100-400 CNC hydraulic press brake. With 400 tons of compressive force we use stainless steel sheets with a maximum setting width of 6,100mm. The SB6100-400 is controlled with 6 axes and is equipped with a Delem 66T graphic touch screen control.
Furthermore, the SB6100-400 is equipped with a CNC controlled bombing system, DSP laser protection and has two movable support arms.

Usable
Stainless steel sheets
setting width 6.100mm

Custom cut sheets required?

That too is easy to arrange with us.
You have the advantage of a shorter delivery time and you can immediately get started with the supplied materials.

Usable
Stainless steel sheets
setting thickness 6.0mm
